

Machining with Winona ORC

Sometimes you need another set of hands.

Winona ORC offers customizable machining services to fit your needs. We partner with you through each step to deliver quality results while increasing your business' bottom line.

Winona ORC is a Tier One supplier of hydrant and valve body machining to two subsidiaries of American Flow control—Waterous Inc., and American Valve and Hydrant. Our specialty is production work on post foundry machining of cast iron. We specialize in **milling, boring, drilling, and tapping** operations. Our track record with the American Flow control is World Class. We consistently meet the customer's quality specifications and provide 99.5% on-time deliveries. With over 25 years of experience in machining, we are planning to expand into other industries in need of cast iron machining. We feel that we can offer a specialized knowledge in production machining that can help your company improve throughput, efficiency, and profitability.

"WORC and Waterous Company have developed an excellent relationship over the years. WORC consistently ranks as one of our best suppliers in terms of cost, quality and delivery. WORC has expanded and improved their capabilities and capacity to meet our requirements. Waterous Company would not hesitate to recommend them to other manufacturing companies in need of machining services."

-Bill Smith, Waterous Company

Three year accreditation from the Commission on Accreditation of Rehabilitation Facilities (CARF), the national review board for rehabilitation programs. (Highest rating)
